PERSONAL SUMMARY

I finished my Ph.D. in September 2012 under the supervision of Prof. Takeo Igarashi. Currently, I am a research scientist at Autodesk Research. Before that, I worked for Autodesk Research in Toronto (with Ryan Schmidt) and Disney Research Zürich (with Bernd Bickel) as a postdoctoral fellow for one year each. I am interested in computer graphics, interactive design interface and mechanical engineering, especially:

- Integrated Design, Simulation and Interaction
- Interactive Simulation
- Fabrication
- Finite Element Methods
- Data-driven Aerodynamics modeling and fabrication
- Biomechanical Simulation

When I was a master's student, I visited the applied mathematics department in TU Delft (the Netherlands) and worked with Prof. Scott MacLachlan and Prof. Kees Oosterlee. After I started my Ph.D, I visited Columbia University in New York and work with Danny Kaufman and Prof. Eitan Grinspun. In another research visit for my Ph.D., I collaborated with Prof. Niloy Mitra at the University College London. In addition, I won an internship at Microsoft Research Asia (working with Weiwei Xu and Xin Tong) in February 2012.

EDUCATION

Ph.D., Computer Science (October 2009 – September 2012)
The University of Tokyo, Japan
Thesis: Interactive Design Exploration of Physically Valid Shapes
Adviser: Takeo Igarashi

M.S., Frontier Science (April 2006 – September 2009)
The University of Tokyo, Japan
Thesis: Coupling analysis of skeletal muscles and skeletal system using Lagrange multiplier
Adviser: Toshiaki Hisada

B.S., Mechanical Engineering (April 2002 – March 2006)
The University of Tokyo, Japan
Thesis: Analysis of open and close phase of heart valve by changing connectivity in time step
Adviser: Toshiaki Hisada

PUBLICATION (JOURNAL)

PUBLICATION (BOOK)

“Introduction of Finite Element Methods in Computer Graphics”, CG Gems JP 2013, chapter 11 (in Japanese).

“Clothing Simulation and Self-collision Handling using Finite Element Method”, CG Gems JP 2012, chapter 9 (in Japanese).

WORK EXPERIENCE

Postdoctoral Researcher (March 2014-present)
Disney Research Zürich, Switzerland

Project Researcher (December 2013-Februrary 2014)
The University of Tokyo/JST ERATO, Japan

Fix-term Research Scientist (November 2012-November 2013)
Autodesk Research, Toronto, Canada

Internship Researcher (February 2012-May 2012)
Microsoft Research Asia, Beijing, China
Supervisor: Dr. Weiwei Xu

Research Fellow (April 2010-October 2012)
Japan Society for the Promotion of Science

Research Assistant (2008 - 2010)
JST ERATO Igarashi Design Interface Project, Japan
Supervisor: Dr. Takeo Igarashi

Chief Developer (2008)
Information – technology Promotion Agency (IPA) Exploratory Software Project, Japan
Supervisor: Dr. Ikuo Takeuchi

AWARDS

Microsoft Research Asia Fellowship (2011)

Best Paper Award (2010)
WISS 2010(Japanese UIST), 18th Workshop on Interactive Systems and Software

Yamanouchi Award (2009)
IPSJ(Japanese ACM), Japanese Symposium on Programming

SUPER CREATER (2008)
Information-technology Promotion Agency (IPA) Exploratory Software

RESEARCH VISITS

Computer Science Department, University College London, UK (August2011-November-2011)
Mentor: Niloy J. Mitra

Columbia Computer Graphics Group, Computer Science Department, Columbia University, USA (April 2010-March 2011)
Mentor: Eitan Grinspun

Numerical Analysis Group, Delft Institute of Applied Mathematics, Delft University of Technology, The Netherlands (April 2007-March 2008)
Mentor: Kees Oosterlee

INVITED TALK

“Simulation-Guided Creation: Interactive Simulation to Animate and Fabricate your Own Idea”, June 2015,
Host: Marie-Paule Cani:“Expressive modeling : New advances towards the seamless creation of 3D content”

“Interactive Design of Functional Shapes”, Schloss Dagstuhl, Germany, September 2014,
Host: Dagstuhl Seminar: "Computational Aspects of Fabrication"

“Interactive Authoring for Designing Physically Valid Shapes”, University of Manitoba, May 2013,
Host: Jim Young

“Interactive Exploration of Physically Valid Shapes”, Disney Research Zurich, February 2013,
Host: Bernd Bickel

“Integration of Design, Simulation and Interaction”, Max Planck Institute Infomatik, October 2011,
Host: Michael Wand

“Interactive integration of design and real-time simulation”, New York University, September 2010
Host: Kenshi Takayama

SOFTWARE

DelFEM: http://code.google.com/p/delfem/
This is an environment for solving various partial differential equations (PDE) using finite element method (FEM). Users can run FEA simulation through simple object oriented C++ problem description. This library is very fast compare to other software using specially designed linear system solver. Thus it achieves real-time computation and interaction between shape modeling and numerical simulation. I developed this library from scratch.

Structural weakness detection for Autodesk MeshMixer®: http://www.meshmixer.com/

During my post-doc in Autodesk, I developed weak structure detection function for Autodesk MeshMixer. This function detects breakable location in a complicated 3D structure in a fraction of a second. This function is used for computational vilification of design for 3D printing. This technology was newly developed and described in a paper “Cross-sectional Structural Analysis for 3D printing”.

Hair simulation for Autodesk Maya, Nucleus®: http://www.autodeskresearch.com/projects/nucleus
During my post-doc in Autodesk, I developed new version of hair simulation component for Nucleus. Nucleus is a simulation library for Maya, which is visual computing widely used design software in the computer animation industry.

Technical Skills

C++, C, OpenGL, Qt, C#, Fortran, .net, HTML, Subversion(SVN), PHP.

- Cross-platform C++ development, across Mac, Windows and Linux platforms.
- Developing large scale software (over 100 thousands lines)
- Distribute and maintain open-source software.
